Strong Skills: JavaScript (ES5/ES6) | React.js | Node.js | HTML5 | CSS3 | jQuery | Express.js | React Dev Tools

Experienced: Object Oriented Programming | Mobile-First | Responsiveness | Agile Methodology | Flexbox | JSON | PHP | Laminas

Tools: Webpack | PostgreSQL | RESTful APIs (AJAX/Fetch) | npm | Babel | Postman | VS Code | Chrome Dev Tools

Applications

BrewMaps: Live Demo | GitHub Repo

- BrewMaps is a **JavaScript** web application developed for beer enthusiasts that wish to locate local breweries within California
- Utilizes three APIs: *Punk API*, *Open BreweryDB*, and *Google Maps*
- Lets users discover local breweries within the state of California through an **AJAX** call to the *Open BreweryDB*
- Displays exact latitude and longitude markers on a rendered map of each brewery through the incorporation of *Google Maps API*
- Allows users to pair a beer to go with their pizza through the *Punk API's* beer pairing parameters set within the **GET** request

Crime-Watch: Live Demo | GitHub Repo

- Dynamic web application that incorporates the *Crimeometer API* for people who want to monitor crime activity in their area
- Employs the use of **Bootstrap 4 CSS** to create responsive styling for all screen sizes
- Utilizes **PostgreSQL**, **Express.js**, and **Node.js** for back-end communication to the client in order to provide the ability for users to login, bookmark incidents, search cities, and set default locations onto their profile

SummerTime Hats: Live Demo | GitHub Repo

- Developed a full stack **React.js** and **Node.js** shopping cart app for people looking to purchase new hats
- Enables users the ability view product details, add a product to a cart and checkout through requests utilizing the **Fetch API**
- Implements **Babel** and **Webpack** to convert **React JSX** into **JavaScript ES6** to allow the web application to function at run-time
