⌨ Technical Skills

Strong Skills: JavaScript (*ES5/ES6*) | React.js | Node.js | npm | HTML5 | CSS3 | jQuery | JSON | React Dev Tools

Experienced: Object Oriented Programming | Mobile-First | Responsiveness | Agile Methodology | Flexbox | Unity3D | C#

Tools: Webpack | PostgreSQL | RESTful APIs (AJAX/Fetch) | Express | Babel | Postman | VS Code | Chrome Dev Tools

📊 Applications

BrewMaps: Live Demo | GitHub Repo
- BrewMaps is a **JavaScript** web application developed for beer enthusiast that wish to locate local breweries within California
- Utilizes three **APIs**: Punk **API**, Open BreweryDB, and Google Maps
- Lets users discover local breweries within the state of California through an **AJAX** call to the Open BreweryDB
- Displays exact latitude and longitude markers on a rendered map of each brewery through the incorporation of Google Maps **API**
- Allows users to pair a beer to go with their pizza through the Punk **APIs** beer pairing parameters set within the **GET** request

Restaurant Website: Live Demo | GitHub Repo
- Dynamic website developed for a restaurant that utilizes **AJAX** to expose server-side functionality and data to the end user
- Employs the use of media queries within the **CSS3** stylesheet to create proper displays for **responsive** screen sizes
- Utilzes semantic elements throughout the **HTML** document to develop clean readable code for others to easily understand and organize each section of the HTML structure

Student Grade Table: Live Demo | GitHub Repo
- Designed dynamic web application using **React.js** for teachers who want to record the grades of their students
- Enables users the ability to create, read, and delete student grades through requests utlizing the **Fetch API**
- Implements **Babel** and **Webpack** to convert **React** JSX into **JavaScript ES6** to allow the web application to function at runtime
